

DID VIDEO WALL Video Splitter All in One

VSA Describe

The Video Splitter uses high performance digital processing chip, the standard impedance matching, input are using standard DVI,HDMI,VGA and USB interface connector, output standard HDMI signal interface connector, transmission can play simple distribution amplification, can display high-definition resolution 1920 * 1080P. The video distributor (D) can allocate a high-definition multiple video signal to multiple display terminals, allowing the use of standard DVI,HDMI,VGA and USB cable to connect directly to the video card. It is suitable for the transmission and application of multi video signal in small system, and it is used in schools, hospitals and other occasions.

VSA Type

Product type	Model	SIZE (mm)
VSA 1*4	HK-DID-VSA-1-4	203mm×120mm×50mm

Picture

VSA Parameter

Connector : DVI-I ,HDMI,VGA,USB

Signal transmission : HDMI

Interface bandwidth:3.15GHz

Video bandwidth:165MHz

Resolution : 1920×1080p (max 1920×1200@60Hz)

Power format: AC100~220V,50/60Hz

Power waste: 10W

temperature: -15℃-55℃

Chassis panel: oxidizing wire

Warranty : one year

Marking: manual, power line, warranty card, certificate of qualification.
